

SPEED TO LEAD v4

PHASE 2 CHECKLIST

Client-Side Features & Service Delivery Verification

Date: June 8, 2026

Live URL: <https://speed-to-lead-8tfi.onrender.com>

Test Credentials: dealer=premier-auto, user=admin

Current Status: Phase 1 complete (222 tests, 317 leads, Twilio ON)

Phase Focus: Client-side features & servicing clients at highest level

Checklist Summary:

Section 1: Dealership Owner / General Manager - 54 items

Section 2: Sales Team / Sales Reps - 20 items

Section 3: Customer Experience - 21 items

Section 4: System Health & Reliability - 12 items

TOTAL: 107 verification items across 4 stakeholder perspectives

SECTION 1: DEALERSHIP OWNER / GENERAL MANAGER

These features serve the person who pays for the product. They need to see ROI, manage their team, and trust the system.

1.1 Login & Authentication

#	Client Feature	Technical Test	Pass
1	Secure login with dealer slug	POST /dashboard/login with valid slug+user+pw -> 302 to /dashboard/leads, session cookie	[]
2	Invalid credentials rejected	POST with wrong password -> 401 + "Invalid credentials" message	[]
3	Unknown dealer slug rejected	POST with nonexistent slug -> 401 + "Unknown dealer slug"	[]
4	Rate limiting on brute force	5 failed logins from same IP -> 429 + "Too many attempts" for 15 min	[]
5	Session expiry (24h)	Login, wait or tamper with cookie timestamp -> redirect to /login	[]
6	Logout clears session	GET /dashboard/logout -> cookie deleted, redirect to /login	[]
7	Unauthenticated access blocked	GET /dashboard/leads without cookie -> 303 redirect to /login	[]
8	Cross-dealer data isolation	Login as premier-auto -> cannot view leads from another dealer by ID	[]

1.2 Lead Pipeline Overview

#	Client Feature	Technical Test	Pass
9	Lead table renders with real data	GET /dashboard/leads -> HTML contains lead names, phones, statuses from DB	[]
10	Stats cards show correct counts	total_leads, active_leads, appt_leads, sold_leads match DB queries	[]
11	Status badges display correctly	Each lead shows colored badge (NEW=green, ASSIGNED=yellow, LOST=red)	[]
12	Health indicators compute correctly	Hot (APPT_SET), Warm (<48h), Cold (<72h), Dead (>72h) - verify each color	[]
13	Click lead row -> detail page	Click any row -> navigates to /dashboard/leads/{id} with correct data	[]
14	"No leads found" empty state	Dealer with zero leads -> shows message, not a crash	[]
15	Lead timestamps render correctly	created_at shows as "Jun 08, 2026 02:30 PM" format	[]

1.3 Needs Attention Widget

#	Client Feature	Technical Test	Pass
16	Unclaimed leads flagged	Lead ASSIGNED > 2h -> red "Unclaimed for Xh" card appears	[]
17	Going-cold leads flagged	Lead ENGAGED > 48h -> yellow "No activity for X days" card	[]
18	Today's appointments shown	Appointment today -> blue calendar card with time	[]
19	Failed deliveries flagged	Message with delivery_status=failed -> red X-circle card	[]
20	Cards sorted by urgency	High urgency (unclaimed) appears before medium (cold)	[]
21	"All clear" state when empty	No items -> green checkmark + "All clear" message	[]
22	Click card -> lead detail	Clicking attention card navigates to lead detail page	[]

1.4 Lead Detail & Timeline

#	Client Feature	Technical Test	Pass
23	Lead info card displays	Name, phone, email, source, status, assigned rep all rendered	[]
24	Unified timeline merges events + messages	State changes and messages appear chronologically in one view	[]
25	Message direction indicators	Inbound vs outbound messages show different icons/colors	[]

#	Client Feature	Technical Test	Pass
26	Message channel shown	Each message shows SMS, WhatsApp, or Email badge	[]
27	AI-generated messages flagged	Messages with ai_generated=true show AI indicator	[]
28	Delivery status visible	Each message shows delivery status (delivered/failed/sent)	[]
29	Appointments section	Booked appointments show date, time, status	[]
30	Reassign lead (HTMX)	POST /leads/{id}/reassign -> assigned_rep updated, toast shown	[]
31	Update status (HTMX)	POST /leads/{id}/status -> lifecycle transition fires	[]
32	Send message (HTMX)	POST /leads/{id}/messages -> Message record + SMS sent	[]
33	Mark sold (HTMX)	POST /leads/{id}/mark-sold -> state=SOLD, redirect to leads	[]
34	Mark lost (HTMX)	POST /leads/{id}/mark-lost -> state=LOST, redirect to leads	[]
35	Schedule follow-up	POST /leads/{id}/follow-up -> LeadEvent with scheduled_for	[]

1.5 Stats & Analytics

#	Client Feature	Technical Test	Pass
36	Date range filter works	?days=7,30,90 -> stats reflect only that window	[]
37	Top stats cards correct	Total, Active, Conversion Rate, Appointments match DB	[]
38	Avg response time computed	Shows human-readable time (e.g., "45s" or "3m 12s")	[]
39	Response time color coding	<60s=green, 60-300s=yellow, >300s=red CSS classes	[]
40	% Within 5 Minutes correct	Percentage = responded_in_5min / total_responded * 100	[]
41	Conversion funnel renders	8 stages (NEW->SOLD) as horizontal bars with counts	[]
42	Funnel narrows correctly	NEW >= AUTO_REPLIED >= ... >= SOLD (or zeros)	[]
43	Source breakdown table	Leads by source with total, conversion%, appt%	[]
44	Source percentage bars render	Visual bars show relative volume per source	[]
45	Rep performance leaderboard	Per-rep: assigned, engaged, appt_set, sold, lost, conv%	[]
46	Leaderboard sorted by sold	Most sales first, gold/silver/bronze rank indicators	[]

1.6 Appointments Calendar

#	Client Feature	Technical Test	Pass
47	Appointments list renders	GET /dashboard/appointments -> shows all with lead names	[]
48	Today/week counts correct	today_count and week_count match actual appointments	[]
49	Show rate computed	showed_count and no_show_pct from completed appointments	[]
50	Status filter works	?status=set,showed,no_show -> list filters correctly	[]
51	Appointment detail links	Each appointment links to associated lead detail page	[]

1.7 Settings & Configuration

#	Client Feature	Technical Test	Pass
52	Dealer info displayed	Name, phone, address, AI persona loaded from config	[]
53	Settings form renders	GET /dashboard/settings -> form fields populated	[]
54	Settings save (if wired)	POST /dashboard/settings -> config updated, toast shown	[]

SECTION 2: SALES TEAM / SALES REPS

These features serve the people on the floor who handle leads daily.

2.1 Team Management

#	Client Feature	Technical Test	Pass
55	Team roster displays	GET /dashboard/team -> shows reps with names and phones	[]
56	Add team member	POST /team with name+phone -> rep added, toast shown	[]
57	Rep performance table	Each rep: assigned, engaged, appt_set, sold, lost, conv%	[]
58	Reps without leads still show	Configured reps with zero leads appear in roster	[]
59	Active rep count correct	Header shows unique reps (configured + with leads)	[]
60	Leads today count	Leads created since midnight UTC	[]
61	Overall conversion rate	total_sold / total_assigned * 100 as percentage	[]

2.2 Lead Assignment & Routing

#	Client Feature	Technical Test	Pass
62	Round-robin assigns evenly	3 reps, 6 leads -> each gets 2 (verify via DB)	[]
63	WhatsApp claim ping sent	New lead -> WhatsApp message to assigned rep	[]
64	Claim via reply "1"	Rep replies "1" -> state=CLAIMED, rep confirmed	[]
65	Pass via reply "2"	Rep replies "2" -> lead reassigned to next rep	[]
66	SLA timeout escalation	No claim in 5 min -> next rep, then manager	[]
67	Inactive reps skipped	Inactive rep -> excluded from rotation	[]

2.3 Lead Interaction from Dashboard

#	Client Feature	Technical Test	Pass
68	Send SMS from lead detail	Type message, send -> outbound Message + Twilio call	[]
69	Message appears in timeline	After send, message shows as direction=outbound	[]
70	Reassign to another rep	Select different rep -> assigned_rep updated	[]
71	Status change via dashboard	Change status -> lifecycle transition fires	[]

SECTION 3: THE CUSTOMER EXPERIENCE

These features are what the car buyer experiences. They are the product.

3.1 Auto-Reply System

#	Client Feature	Technical Test	Pass
72	Instant auto-reply on SMS	Customer texts -> auto-reply within 60s mentioning vehicle	[]
73	Auto-reply mentions dealer name	Reply includes dealership name from config	[]
74	Auto-reply mentions vehicle	Reply references specific vehicle customer asked about	[]
75	Auto-reply asks one clear question	Reply ends with question moving toward a visit	[]

#	Client Feature	Technical Test	Pass
76	Lead appears in dashboard	After auto-reply, lead shows with state=AUTO_REPLIED	[]

3.2 AI Qualification & Booking

#	Client Feature	Technical Test	Pass
77	AI qualifies timeline	"Looking to buy this week" -> AI recognizes urgency	[]
78	AI qualifies trade-in	Customer mentions trade-in -> AI asks about vehicle	[]
79	AI qualifies financing	Customer asks about payments -> AI acknowledges safely	[]
80	AI books appointment	Customer agrees to time -> Appointment created, APPT_SET	[]
81	AI offers specific slots	"Tuesday 2pm or Wednesday 10am" not "when works for you"	[]
82	AI respects guardrails	Price negotiation -> AI deflects to rep	[]
83	AI uses real inventory only	Mentioned car exists in Vehicle table	[]

3.3 After-Hours Mode

#	Client Feature	Technical Test	Pass
84	After-hours detection	System identifies business vs after-hours from config	[]
85	AI runs autonomously after hours	After-hours lead -> AI handles full conversation	[]
86	Morning summary generated	After-hours leads -> summary for reps at start of business	[]

3.4 Compliance (CASL + PIPA BC)

#	Client Feature	Technical Test	Pass
87	Opt-out honored immediately	"STOP" -> confirmation sent, no further messages	[]
88	Opt-out logged	STOP -> ConsentLog entry with timestamp and keyword	[]
89	Opted-out customer ignored	Opted-out texts again -> no response	[]
90	Quiet hours respected	No messages during quiet hours (default 9PM-8AM)	[]
91	Sender identification	Every SMS includes dealer name + opt-out instructions	[]
92	Consent capture	New lead -> consent recorded in ConsentLog	[]

SECTION 4: SYSTEM HEALTH & RELIABILITY

4.1 Infrastructure

#	Client Feature	Technical Test	Pass
93	Health endpoint live	GET /healthz -> 200 {"status":"ok","db":"ok"}	[]
94	Readiness endpoint live	GET /readyz -> 200 {"status":"ready"}	[]
95	No JS console errors	browser_console() on each page -> zero errors	[]
96	Dark theme renders correctly	Background #0a0a0f, surface #12121a, accent #6366f1	[]
97	Responsive on mobile	Sidebar collapses, content stacks on narrow viewport	[]
98	HTMX partial updates work	Filters/search -> table updates without page reload	[]
99	Sidebar navigation correct	All nav links route to correct pages	[]
100	Active page highlighted	Current page's nav item has distinct indicator	[]

4.2 Data Integrity

#	Client Feature	Technical Test	Pass
101	LeadEvent append-only	State changes create events, never modify existing	[]
102	Message records complete	Every SMS has Message record with direction/channel/body	[]
103	Appointment records linked	Each appointment has valid lead_id foreign key	[]
104	Dealer isolation verified	Query dealer A -> zero results from dealer B	[]

TESTING PROTOCOL

Phase 2 Execution Order

1. Automated tests first:

pytest -q --tb=short (all 222+ tests must pass)

2. Browser walkthrough:

Login -> click every page -> check console for errors

3. HTMX interaction test:

Click every button, fill every form, verify toast messages

4. Data verification:

Compare dashboard numbers against direct DB queries

5. Mobile viewport test:

Resize browser to 375px width, verify layout adapts

Success Criteria

- [] All 104 checklist items pass
- [] Zero JavaScript console errors on any page
- [] All HTMX interactions return 200 + show toast confirmation

- ☐ Dashboard numbers match direct DB queries
- ☐ Dark theme renders consistently across all pages
- ☐ No broken links or 404s in navigation

Notes

- Twilio is ON: real SMS will send during live-fire tests (items 72-76, 87-88)
- Use OUTBOUND_ENABLED=false for dashboard-only testing to avoid burning credits
- Items marked [FUTURE] in FEATURES.md are out of scope for Phase 2
